## ACTIVE LICENSEE DISCLAIMER

TO: ACTIVE LICENSEE  
FROM: G.L.S.B.C. Board of Directors  
SUBJECT: DISCLAIMER FORM

**BY FILLING OUT THIS FORM YOU ARE AGREEING TO THE FOLLOWING:**

That I am a licensee of the G.L.S.B.C.

To remove such watercraft from land storage no later than June 1st and further agree that if such watercraft is not moved from land storage by June 1st, the G.L.S.B.C. may take any action that it deems necessary to have the watercraft removed from the premises and that I will pay all expenses related to such removal.

I further agree that I assume all risk of accident or injury to myself or to such other persons who are on the premises of the G.L.S.B.C. at my request, and for any loss or damage which may occur to the watercraft described on my application while such craft is moved or stored on the premises of the G.L.S.B.C. and hold G.L.S.B.C. harmless therefrom.

I further agree that I will report in writing to the Board of Directors of the G.L.S.B.C. any legal transfer of the ownership of the craft stated on the application within TEN (10) days of such transfer of ownership.

I further agree that I will not make any electrical hook-ups to my boat while in winter storage, unless I am in full attendance for the duration of the hook-up and ensure complete electrical disconnect before leaving.

I further agree to submit photocopies of my insurance certificate and Michigan watercraft registration with my application but not later than launch date.

I further agree to supply 2'x 2' plywood boards to be placed under the jack stands for my craft. All copies of the proper forms must be submitted and paid in full prior to LAUNCH and HAUL-OUT dates.

**ATTENTION:**

You are expected to lend assistance to the work party on both Launch and Haul-out dates.

The launching and hauling out of boats and setting them on jack stands is not a service provided by the G.L.S.B.C., but is a cooperative effort of all licensees. Each boat owner is responsible for their own belt placement, setting their own jack stands, and height off the ground.
